DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 51 is rejected under 35 U.S.C. 102(b) as being anticipated by Spiess.

The Spiess reference discloses a a method for filling containers in an automated filling operation comprising conveying a generally continuous stream of adjacent contacting containers to an in-feed section of a circular filling machine (see Fig 1), at the in-feed section, transferring the continuous stream of adjacent contacting containers onto a generally circular rotating path and conveying the articles around the rotating path in adjacent contact with each other, after said transferring, engaging the containers with respective rotating filling elements, (se Figs 2 and 3) and filling the containers with the filling elements as there are conveyed along an arcuate portion of the circular rotating path, as claimed.

Allowable Subject Matter

Claims 1-50 are allowed.

Claim 52 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
